

Grech Motors GM33

Innovation. Quality. Style

Grech Motors creates distinction by the superior design and quality in every bus they build. Their US design and utility patents reflect their commitment to innovation, giving their buses the form, function and standout curb appeal they are known for. Safety is paramount. Grech Motors uses a high-strength steel tube frame with 360° welding, tempered glass windows and aircraft-grade aluminum sidewalls among many other safety features, to build the safest midsize bus on the market.
